

# Reaction Stoichiometry

## Video Workbook with Dr. B

More guides at  
[www.breslyn.org](http://www.breslyn.org)

Reaction Stoichiometry problems follow the same general steps:

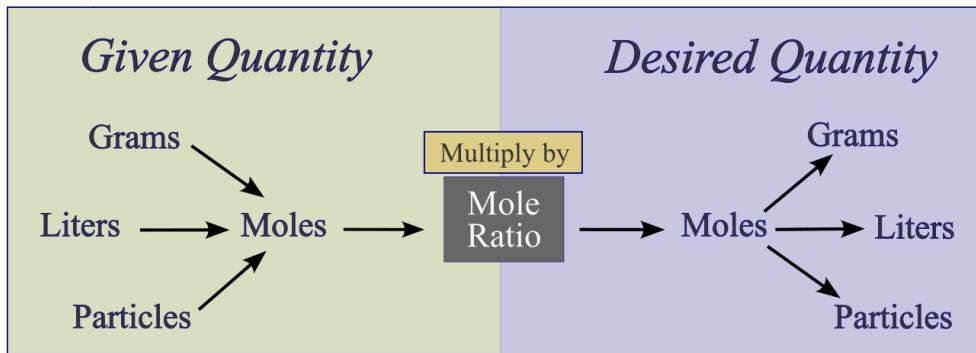

Step 1: Balance the equation and label the *given* and *desired* quantities.

Step 2: Plan your strategy.

- Convert *given* quantity to moles.
- Use the mole ratio to convert moles of *given* to moles of *desired*.
- Convert moles of *desired* to the units you need to end up with.

Step 3: Do the math!

Example: In the equation:  $\text{H}_2 + \text{O}_2 \rightarrow \text{H}_2\text{O}$ , how many grams of  $\text{H}_2\text{O}$  will be formed if you start with 3.2 g of  $\text{O}_2$ ?

Balance the equation. Convert 3.2g of  $\text{O}_2$  to moles of  $\text{O}_2$ . Use the mole ratio to find moles of  $\text{H}_2\text{O}$ . Convert moles  $\text{H}_2\text{O}$  to grams.

Watch this video for a full explanation: [https://youtu.be/l9\\_rM-rARSQ](https://youtu.be/l9_rM-rARSQ)

Teachers use different formats to solve these problems. But the process, and end result, are the same.

You must be able to quickly:

- Find the Molar Mass.
- Convert between moles and grams.
- Use the mole ratio.

Remember, the mole ratio comes from the coefficients in the balanced equation.

Often the term “in excess” will be used in problems. It just means you don’t need to worry about the amount of that substance being limiting.

Watch this video on how to solve stoichiometry problems!

## Practice with Video Explanations

*Problem 1:* Calculate the moles HCl needed to react completely with 8.25 moles of zinc.

<https://youtu.be/Z5Nw9Hzjq7E>

*Problem 2:* How many molecules of CO<sub>2</sub> will be produced if 4.2g of CH<sub>4</sub> reacts completely. Assume excess O<sub>2</sub>.

<https://youtu.be/8NaGKJVd5eQ>

*Problem 3:* How many moles of O<sub>2</sub> will react with Al to form 2.4 moles of Al<sub>2</sub>O<sub>3</sub>?

<https://youtu.be/LRATL-nmuYo>

*Problem 4:* How many liters of CO<sub>2</sub> are produced if 4.7 grams of Glucose (C<sub>6</sub>H<sub>12</sub>O<sub>6</sub>) reacts completely?

<https://youtu.be/KssKjqFL6Ds>

**Answers** (Note, depending how you round you may get a slightly different answer.)

<p>Problem 1: 16.5 mol HCl <a href="https://youtu.be/Z5Nw9Hzjq7E">https://youtu.be/Z5Nw9Hzjq7E</a></p>	<p>Problem 2: 3.6 moles O<sub>2</sub> <a href="https://youtu.be/LRATL-nmuYo">https://youtu.be/LRATL-nmuYo</a></p>	<p>Problem 3: 1.16 L CO<sub>2</sub> gas <a href="https://youtu.be/KssKjqFL6Ds">https://youtu.be/KssKjqFL6Ds</a></p>	<p>Problem 4: 1.6 x 10<sup>23</sup> molecules CO<sub>2</sub> <a href="https://youtu.be/8NaGKJVd5eQ">https://youtu.be/8NaGKJVd5eQ</a></p>
